

# PLACEMENT TIPS

## THE RIGHT LEVEL OF FLY CONTROL

Sticky Traps

HIGH-LEVEL

### CEILING ATTICS RAFTERS

- Flies rest up high
- Bright colors entice flies to land
- Hang in livestock areas above their reach

Odor Traps

MID-LEVEL

### WALLS FENCES CORRALS

- Flies mate higher than feeding level, but lower than resting
- Pheromones and feeding stimulants lure flies to traps
- Hang along fence lines, calf hutches, sheds and more to attract flies

Scatter Baits and Abatement Strips

LOW-LEVEL

### FLOORS LEDGES GATES

- Flies feed at low levels
- Sugar base and attractants encourage flies to feed
- Scatter on the ground or hang outside of livestock reach
