Horse Health Ivermectin Paste (1.87% ivermectin)
IverCare Paste (1.87% ivermectin)
Ivermectin Paste (1.87% ivermectin)
Quest Gel (moxidectin)
Quest Plus Gel (moxidectin & praziquantel)
Zimecterin Paste (1.87% ivermectin)
Zimecterin Gold Paste (1.55% ivermectin & 7.75% praziquantel)

November/December

Exodus Paste (pyrantel pamoate)
Pyrantel Paste (pyrantel pamoate)
Strongid Paste (pyrantel pamoate)

This schedule is a very basic dewormer rotation program. If you suspect your horses may have tapeworms or would like a dewormer program customized to your region or conditions, consult your veterinarian for a course of treatment.

If you need a daily dewormer, such as Strongid C 2X, be aware that it is not effective against bots, so you should deworm once in the fall and once in the spring using 1.87% equine ivermectin paste dewormer to control bot infestations.
